

DIAMONDSHARP™

SUPER PIRANHA Jr.

for EMERGENCY RESCUE
DEMOLITION and RECYCLING work

3B

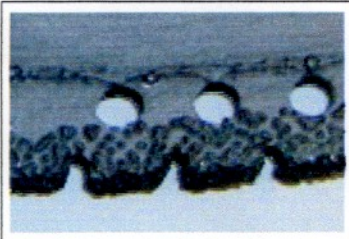

" Our name says it all "

No question about it, the Super Piranha Jr. diamond blade is the best quality demolition blade that can serve a dual function. Use it for Emergency Rescue work, cutting ductile iron or wood

Quickly slices through sheet metal and steel on emergency calls in less time than other similar blades and it won't bind up in the cut.

Twice as fast as as abrasive blades and eliminates the need for frequent blade changes during emergency rescue operations.

Able to make scores of cuts in ductile iron pipe as well as cast iron, PVC, plastic pipe and sheet metal. Doesn't leave rough burrs and may also be used on chop saws.

High quality diamond grit is vacuum bonded to segments. Cooling holes serve to dissipate heat buildup allowing for prolonged sawing cycles.

Laser-welded segments for operator safety.

CAUTION: When sawing ; Always wear safety goggles, dust mask, gloves, hard hat and other protective clothing.

Both sides of Diamondsharp's Super Piranha Blade shown above have a silicon carbide hard facing that prevents drag and resistance, allowing the diamonds to do their work while maintaining side clearances.

Super Piranha Jr. is the fastest cutting saw blade of its kind and deserves a place in any tool box.

National Guard - Military - FBI - Demolition Crews - Search & Rescue Teams - FEMA Renovators - Wreckers & Recyclers - Salvage Yards - Fence Contractors - Farmers Building Contractors - Sewer Line Contractors - Landscapers - Fire & Police Units
